Make Only
Prepare the order only, cover and place it on a shelf (do not insert to oven), until a driver becomes available
Further instructions on the next page

BYTE by Yum!

"Make Only" - Functionality

After preparing the items and covering them:

1. Click anywhere on the order
2. The system will display a default shelf to select
3. Click the relevant shelf

"Make Only" - Functionality

After clicking the shelf,
The order will be displayed on
the screen on the relevant shelf

The cook should physically place
the order Items on the correct
shelf in the kitchen.

BYTE
by Yum!
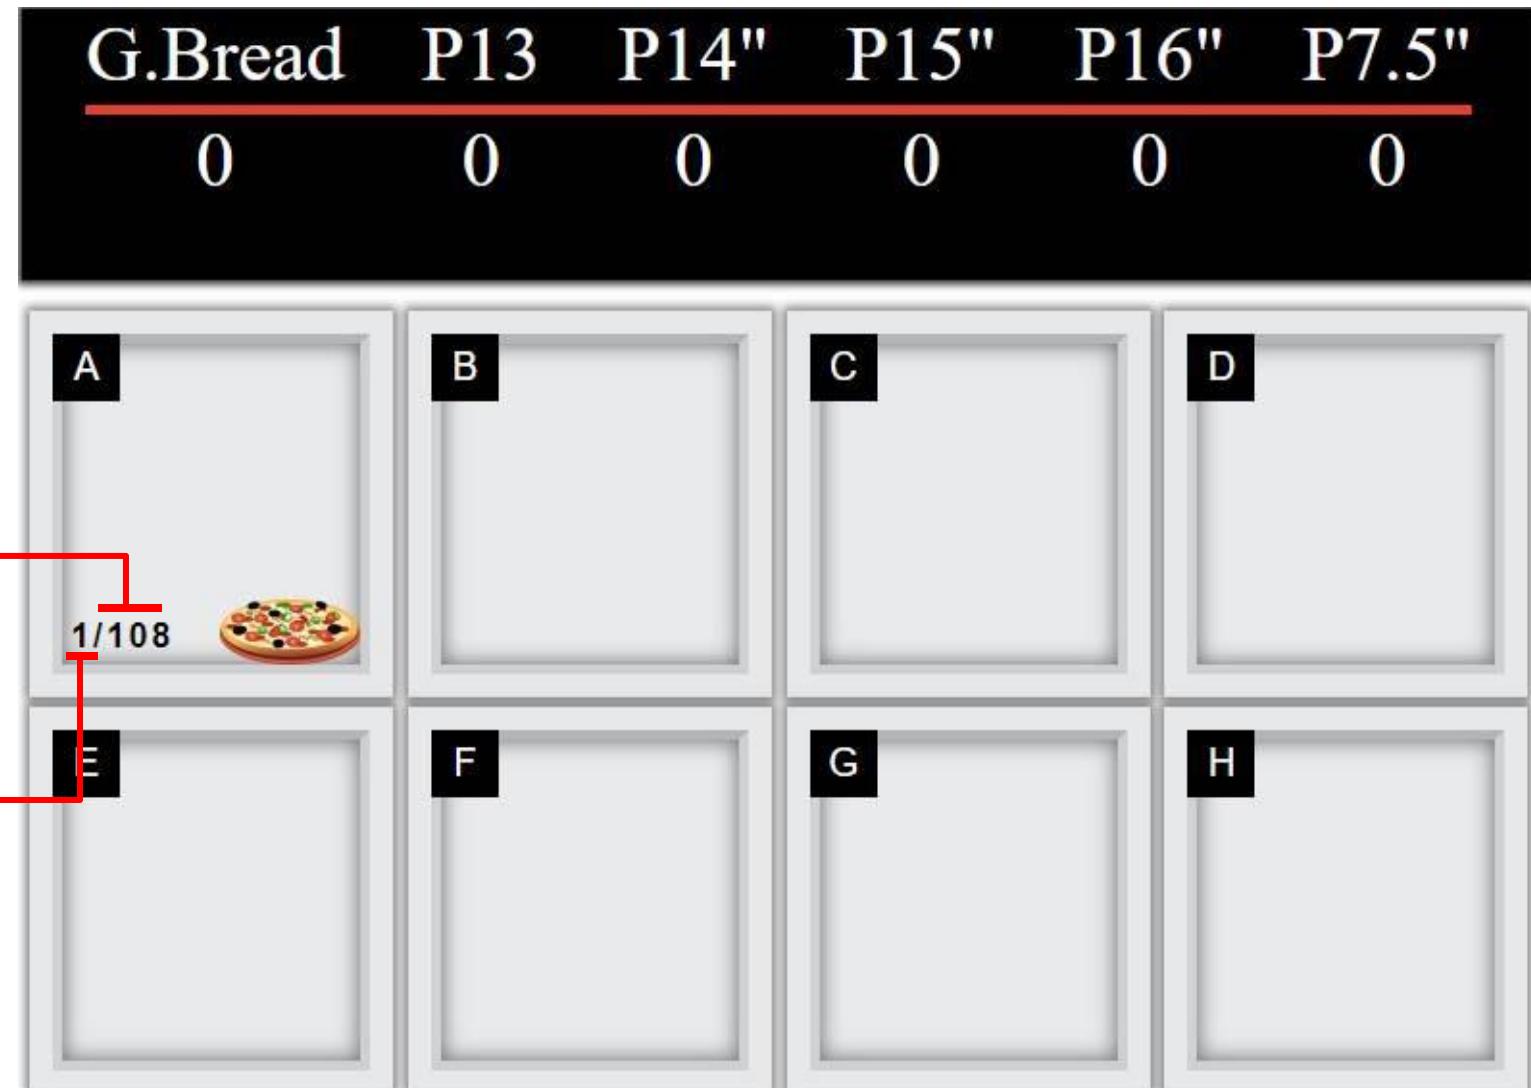

"Make Only" - Functionality

As soon as a driver becomes available to take the delivery/ies, the system will alert and the order frame will blink, Instructing the cook the insert orders to oven

If multiple shelves are blinking, the system will number them. The cook must insert the orders to the oven in the correct order based on the numbers (first 1, then 2...)

In case two or more shelves are displayed with the same number, it means they are designated to go on the same route (same driver)
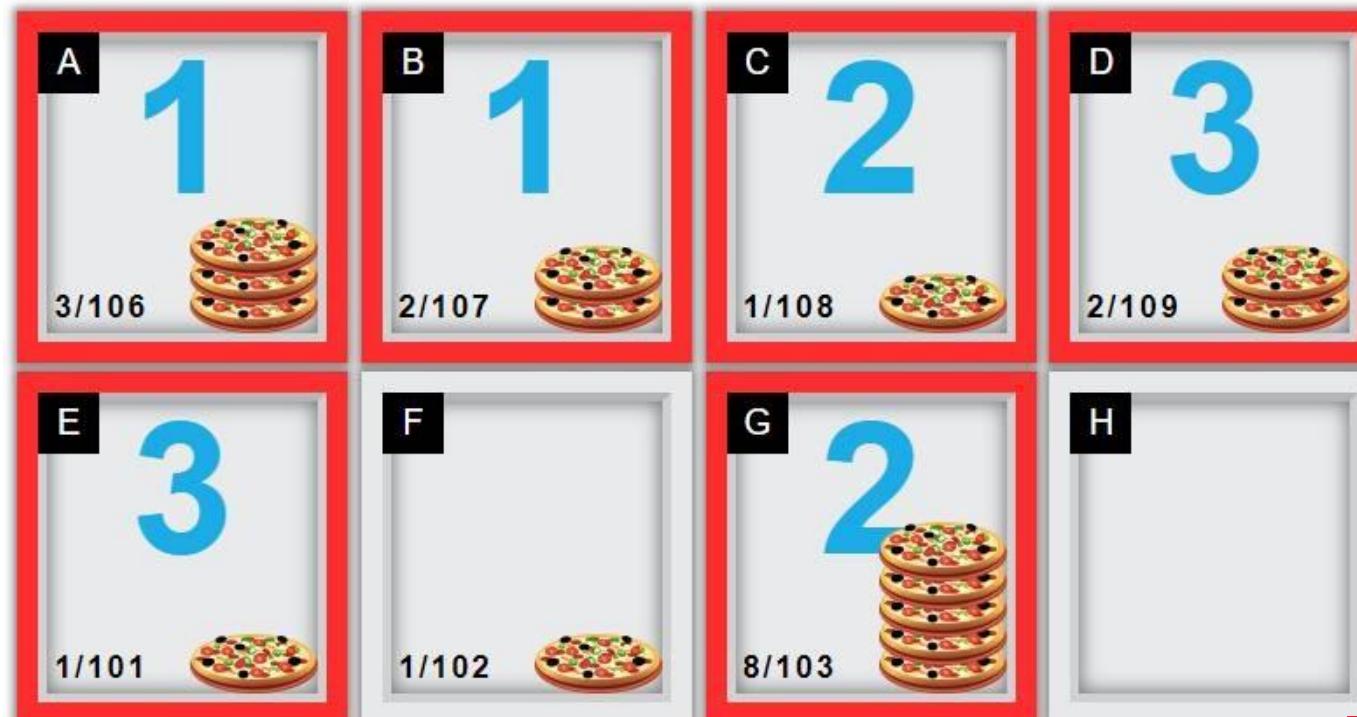

"Make Only" - Functionality

To insert the orders to the oven:

1. Click the shelf
2. Click Bake
